### WHAT I CAN DO

- Focus on business needs instead of resume driven development.
- Get stuck in and get my hands dirty (with code, I'm not a good gardener).
- Client-facing friendly and able to communicate effectively with external parties and internal stakeholders.
- Happily bring ideas and honesty to the table to aid technical direction within a business.
- Help mentor and manage small teams of developers and project management.

### EXPERIENCE

#### TIME RELOCATION | Consultant CTO

2014 - CURRENT | REMOTE

Technical Lead & Consultant CTO for startup platform serving the corporate relocation market. Advisor for strategic decisions related to the technological segment of the business. Recently acquired by Crown Mobility for considerable sum.

#### ROOFING COMPANY (NDA) | Fullstack Dev

MARCH 2017 - CURRENT | REMOTE

Helping transform an existing platform into a mobile-ready design built around Laravel and a heavy lean on Vue components for dynamic functionality. This platform runs the company's entire business operations. It's big!

#### NDA CLIENT | Consultant CTO

2014 - PRESENT | REMOTE

Technical Lead & Consultant CTO for startup with household celebrity name backing. Focus on REST API designed to scale well to millions of users. Devops lead investigating hosting solutions that solve both technical and business requirements.

#### CYBER DUCK | Contract Laravel Developer

DECEMBER 2016 - MARCH 2017 | PART REMOTE

Contract Web Application Developer for a digital publishing platform. Hardware integration via bespoke APIs and PDF processing workers.

#### LAUNDRAPP | Contract Laravel Developer

MARCH 2016 - JUNE 2016 | REMOTE

Tasked with refactoring old code. Helped build processes around the existing web team for smoother workflows and reduced deployment risk.
